PRINTING PROCESS

We use a rip-stop reinforced banner substrate. The edges are hemmed using a cold weld adhesive system. This process is stronger than a stitched edge and has no visible stitch marks. Stitching actually weakens banner edges and can tear. All inks/dyes used are guaranteed for a minimum of 3 years outdoors (24 hours a day exposure) and are environmentally safe product (eco solvent process).

COUNCIL REGULATIONS

If you are planning to advertise on council community boards then order your banner a max 1m high. It's difficult to get council approval for banners that are larger than 1m in height.
